

Holcomb Bridge Road Interchange (Design Only)

Project Manager | Rob Dell Ross, P.E. | Senior Transportation Engineer

PROJECT OVERVIEW

T-SPLIST funds will be used for the design only of improvement projects at this interchange, including those identified during the City of Roswell's 2012 Holcomb Bridge Road Corridor Study. The scope of work will be determined later as part of this engineering effort. Potential future improvements may include reconstruction of bridges, ramps, or other operational projects in the area in coordination with GDOT. The City is coordinating with GDOT in regard to their proposed Express Lane project to determine how that may impact the existing interchange.

If TSPLOST funds remain after design of selected projects is complete, they could go towards partial funding for Right of Way (ROW) and construction.

Total Project Cost: \$6 million
